

SARAVANAN T H

DEVOPS ENGINEER

Chennai - 600128 | saravananth2401@gmail.com | +91 6369032798

www.linkedin.com/in/saravanan-t-h-b82130213

EXECUTIVE SUMMARY

- DevOps Engineer with 4+ years of experience in CI/CD pipeline automation, cloud infrastructure management, and containerized application deployments.
- Expertise in Azure DevOps, GitHub, Git, Jenkins, Kubernetes, Docker, Helm, and Argo CD for building scalable and automated deployment platforms.
- Experienced in Infrastructure as Code (IaC) using Terraform and Ansible, with strong Linux administration and automation skills.
- Proficient in implementing GitOps practices, Kubernetes administration, application deployment troubleshooting, and cloud-native operations.
- Skilled in monitoring and observability using Prometheus, Grafana, Azure Monitor, and Log Analytics to ensure high availability and operational excellence.

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900)
- Microsoft Security, Compliance, and Identity Fundamentals (SC-900)
- Microsoft Azure Administrator Associate (AZ-104)
- Microsoft Sentinel Ninja
- Currently preparing for:
 - Microsoft AZ-400: Azure DevOps Expert

TOOLS & TECHNOLOGIES

PRIMARY SKILLS

CI/CD & Source Control: Azure DevOps, GitHub, Git, GitHub Actions, Jenkins, CI/CD Pipeline Development.

Containerization, Kubernetes & GitOps: Kubernetes, Docker, Helm, Argo CD (GitOps).

Infrastructure as Code & Automation: Terraform, Ansible, Shell Scripting (Bash), YAML Automation.

Cloud Platforms: Microsoft Azure, Azure Networking, Azure Monitor, AWS (IAM, EC2, S3, VPC, CLI).

Monitoring & Observability: Prometheus, Grafana, ELK Stack, Azure Monitor, Log Analytics.

SECONDARY SKILLS

Operating Systems & Platform Engineering: Linux Administration, System Monitoring, Performance Tuning, Application Deployment, Infrastructure Troubleshooting.

DevSecOps & Security: SonarQube, SonarCloud, Semsigrep, Trivy, SAST, DAST, SCA, Secure CI/CD Practices.

Collaboration & ITSM Tools: Jira, ServiceNow, BMC Helix ITSM, Incident Management, Change Management.

PROFESSIONAL EXPERIENCE

Wipro Technologies, Chennai

December 2021-Present

- Built and managed CI/CD pipelines in Azure DevOps, integrating GitHub repositories, automated quality checks, and deployment workflows for cloud-native applications.
- Administered and supported Kubernetes environments, performing cluster troubleshooting, deployment management, resource tuning, and application availability improvements.
- Implemented GitOps workflows with ArgoCD and developed reusable Helm charts for standardized Kubernetes deployments across development and production environments.
- Provisioned and managed cloud infrastructure using Terraform and Azure services, automating environment creation, configuration management, and deployment processes.
- Configured monitoring, logging, and alerting using Prometheus, Grafana, Azure Monitor, and Log Analytics, enabling proactive issue detection and rapid incident response.

M.TECH PROJECT – SOFTWARE SYSTEMS

Project Title:

Secure Banking Transaction Portal – End-to-End DevSecOps CI/CD, GitOps, Security Scanning & Kubernetes Monitoring Platform

Project Summary:

- Designed and implemented a secure banking transaction portal using Python and Flask, following DevSecOps best practices across the software development lifecycle.
- Containerized the application using Docker and deployed it on a Kubernetes cluster with automated scaling using Horizontal Pod Autoscaler (HPA).
- Built a GitHub Actions CI/CD pipeline integrating automated code quality and security validation using SonarQube, Bandit, and Snyk.
- Implemented GitOps deployment workflows using Argo CD to continuously synchronize Kubernetes resources from GitHub repositories.
- Built a GitHub Actions CI/CD pipeline integrating automated security and quality validation using SonarQube, Bandit, Trivy, and Snyk before container image deployment.
- Configured GitHub Container Registry (GHCR) for automated Docker image build, versioning, and container artifact management.
- Deployed Prometheus and Grafana monitoring stack to collect infrastructure and application metrics and provide real-time observability dashboards.
- Established a complete DevSecOps workflow covering source control, CI/CD, security scanning, containerization, orchestration, GitOps deployment, and monitoring.

Impact Metrics:

- Automated application build, security scanning, and deployment workflows, reducing manual deployment effort by approximately 80%.
- Implemented automated SAST and dependency vulnerability scanning to identify security issues before deployment.
- Enabled GitOps-based continuous deployment using Argo CD, ensuring Kubernetes cluster state remained synchronized with source-controlled configurations.
- Improved application availability through Kubernetes self-healing capabilities and Horizontal Pod Autoscaler configuration.
- Centralized infrastructure monitoring using Prometheus and Grafana, providing real-time visibility into CPU, memory, pod, and cluster health metrics.
- Successfully integrated multiple DevSecOps tools into a unified deployment pipeline, simulating enterprise-grade CI/CD and cloud-native operational workflows.

Tech Stack:

Python, Flask, Git, GitHub, GitHub Actions, Docker, Kubernetes (Kind), Horizontal Pod Autoscaler (HPA), SonarQube, Bandit, Trivy, Snyk, GitHub Container Registry (GHCR), Argo CD, Prometheus, Grafana, Alert Manager, Node Exporter, kube-state-metrics, YAML, Helm.

EDUCATION CREDENTIALS

Master of Technology - Software Systems

April 2022 - November 2025

Birla Institute of Technology and Science (WILP Division) - Pilani.

Bachelor of Computer Applications

June 2018 - July 2021

Dharmamuthi's Rao Bahadur Calavala Cunnan Chetty's Hindu College - Pattabiram, Chennai.

ADDITIONAL INFORMATION

Languages: Telugu, English & Tamil.

NSS Volunteer (National Service Scheme): Engaged in community outreach programs, public awareness initiatives.
